FULL STACK WEB DEVELOPER and AI/ML

PROFILE

Passionate Web Developer and Data Science enthusiast with experience building modern, user-friendly digital solutions. Skilled in Full Stack Development (React.js, Node.js, Flask, SQLAlchemy) and Machine Learning (TensorFlow, Deep Learning). Proven track record of developing functional applications, including e-commerce platforms and task management systems. Dedicated to combining great design with intelligent, data-driven logic to create impactful software.

PROJECTS

1. E-commerce Website

(Html, CSS, JavaScript, Flask)

<https://ecommerce8.pythonanywhere.com/>

Full-stack e-commerce platform mirroring major retailers. Features include a comprehensive vendor dashboard, secure shopping cart, unique group buying capabilities, and real-time email notifications for complete order lifecycle tracking.

2. Heart Disease Detector

(HTML, CSS, JavaScript, Python, Flask, Sklearn, Pandas, Matplotlib)

<https://heartdisease.pythonanywhere.com/>

End-to-end Machine Learning web application deployed on PythonAnywhere. Features a responsive Flask backend and Random Forest model, providing distinct interfaces for raw clinical data entry and user-friendly symptom assessment.

Clients

1. Ratan Industries

(React, CSS, Type Script)

<https://ratanindustries.netlify.app/>

Designed and developed a professional chemical manufacturing website featuring product catalogs, industry-focused solutions, quality compliance sections, SEO optimization, and a clean, interactive UI built with React.

2. Yash Raj Cab Services

(React, CSS, Type Script)

<https://yashrajcabservices.netlify.app/>

Built a modern taxi service website for Yash Raj Cab Services, focusing on user-friendly navigation, service clarity, mobile responsiveness, and conversion-driven layout for local, airport, and outstation bookings.

SKILLS

- Frontend: HTML5, CSS3, JavaScript, React.js, TypeScript
- Backend: Python (Flask), Node.js, Express.js
- Database: MySQL, MongoDB
- Tools & Platforms: VS Code, Git & GitHub
- Other: Responsive Design, API Integration, Problem Solving

EDUCATION

Bachelor of Engineering in Computer Engineering (2026 - present)

- Shankersinh Vaghela Bapu Institute of Technology
